WORK EXPERIENCE

UI/UX Designer Aide - ASU Learning Engineering Institute

Jun 2026 - Present

- Researching AI UX patterns for a repository built with Claude Code, evaluating each against edtech needs.
- Built the visual identity for LEXI, LEI's student internship program, designing 5 shape combinations for its core values and scaling them into patterns across a student workbook, event backdrop, tote bags, posters, and social posts; earned a SUN Award for the tight timeline.

Product Design Intern - Oxy Design Agency

Feb 2026 - Jul 2026

- Led design on a personal site for a VC platform executive, wireframing and building 8 hi-fi pages that organized 4 work streams (advising, writing, teaching, film) into one navigable structure.
- Compared Oxy Aero, a private aviation studio, against 3 bespoke design firms and ran a 28-issue usability audit, then explored three hero directions in Claude Design; the creative director selected one as final.
- Designed the sitemap for Friday Harbor, an AI mortgage platform; the redesigned site launched on it.

UI/UX Design Intern - Nielsen

Jun 2025 - Sep 2025

- Designed an upsell flow that surfaced the paid Planning feature's value at three moments of intent, specifying every state to Nielsen ONE design system standards so developers could build without guessing; approved after two review rounds.
- Restructured raw backend data into a Data Overlap column and calendar-style table in Nielsen ONE, a B2B analytics platform, letting media buyers verify coverage before running a report blind.

Design Intern - Sinopia Digital Marketing Agency

Mar 2024 - Oct 2024

- Built foundational layouts for client sites with the design team, including the Digestive Institute of Arizona, whose launched site drove 2.14x traffic and 1.9x patient leads.

PROJECTS

Smile Donor - Nonprofit Website Redesign (ASU Barrett Honors Thesis)

Mar 2026 - Present

- Interviewed 4 online donors and found the site had no analytics, grounding the redesign in qualitative research.
- Benchmarked 3 national nonprofits and ran a heuristic evaluation, which found the site's strongest trust-building content buried in body text and absent from the donation flow.
- Translated findings into a proposed sitemap, with redesign and usability testing underway.

Find My Size - End-to-End UX Project (ASU GIT 340)

Jan 2026 - Apr 2026

- Designed a sizing-confidence tool for online shoppers, from user interviews to a tested Figma Make prototype.
- Embedded it in the product page rather than a standalone app, backing each recommendation with the shopper's own inputs, fit social proof, and return reassurance.

SKILLS

Tools: Figma, Figma Make, Claude Design, Claude Code, Relume, Adobe Illustrator & Photoshop, HTML & CSS, GitHub

Methods: User research, user flows, wireframing, prototyping, usability testing, heuristic evaluation, information architecture, design systems, data visualization, brand identity

Illustration: Portraiture, graphite, acrylic, digital illustration

EDUCATION

B.A. Media Arts and Sciences (Graphic Information Technology)

2023 - 2027

Arizona State University, Barrett Honors College (Tempe, AZ)

Dean's List (GPA: 4.04/4.00) · Presidential Volunteer Service Award Gold, SUN Award
