WORK EXPERIENCE

UI/UX Designer Aide – ASU Learning Engineering Institute

Jun 2026 – Present

- Built the visual identity for LEXI, LEI's student internship program, designing 5 shape combinations to represent its core values: intersection, learning, growth, teamwork, and innovation.
- Scaled the shapes into repeatable patterns across a student workbook, event backdrop, tote bags, posters, and social posts; earned a SUN Award for delivering the system on a tight timeline.

Product Design Intern – Oxy Design Agency (Remote)

Feb 2026 – Jul 2026

- Led design on a personal site for a VC platform executive, wireframing and building 8 hi-fi pages that organized 4 work streams (advising, writing, teaching, film) into one navigable structure.
- Compared Oxy Aero, a private aviation studio, against 3 bespoke design firms and ran a 28-issue audit, then translated the findings into three hero directions; the creative director selected one as final.
- Designed the sitemap for Friday Harbor, an AI mortgage platform; the redesigned site launched on it.

UI/UX Design Intern – Nielsen (Remote)

Jun 2025 – Sep 2025

- Designed an upsell flow that surfaced the paid Planning feature's value at three moments of intent; approved after two review rounds and handed to development.
- Restructured raw backend data into a Data Overlap column and calendar modal, letting media buyers verify coverage before running a report blind.
- Specified every component state in Figma, including mode and content-length variants, so developers could build without guessing.

Design Intern – Sinopia Digital Marketing Agency (Remote)

Mar 2024 – Oct 2024

- Built foundational layouts for client sites with the design team, including the Digestive Institute of Arizona, whose launched site drove 2.14x traffic and 1.9x patient leads.

PROJECTS

Smile Donor – Nonprofit Website Redesign (ASU Barrett Honors Thesis)

Mar 2026 – Present

- Interviewed 4 online donors and found the site had no analytics, grounding the redesign in qualitative research.
- Benchmarked 3 national nonprofits and ran a heuristic evaluation, which found the site's strongest trust-building content buried in body text and absent from the donation flow.
- Translated findings into a proposed sitemap, with redesign and usability testing underway.

Find My Size – End-to-End UX Project (ASU GIT 340)

Jan 2026 – Apr 2026

- Designed a sizing-confidence tool for online shoppers, from user interviews to a tested Figma Make prototype.
- Embedded it in the product page rather than a standalone app, backing each recommendation with the shopper's own inputs, fit social proof, and return reassurance.

SKILLS

Tools: Figma, Figma Make, Adobe Illustrator & Photoshop, Claude Design, HTML & CSS, GitHub, Claude Code

Methods: User research, wireframing, prototyping, usability testing, heuristic evaluation, information architecture, brand identity

Illustration: Portraiture, graphite, acrylic, digital illustration

EDUCATION

B.A. Media Arts and Sciences (Graphic Information Technology)

2023 – 2027

Arizona State University, Barrett Honors College (Tempe, AZ)

Dean's List (GPA: 4.04/4.00), Presidential Volunteer Service Award Gold
